

Topic: Soccer Players

We will look at the Age of Players

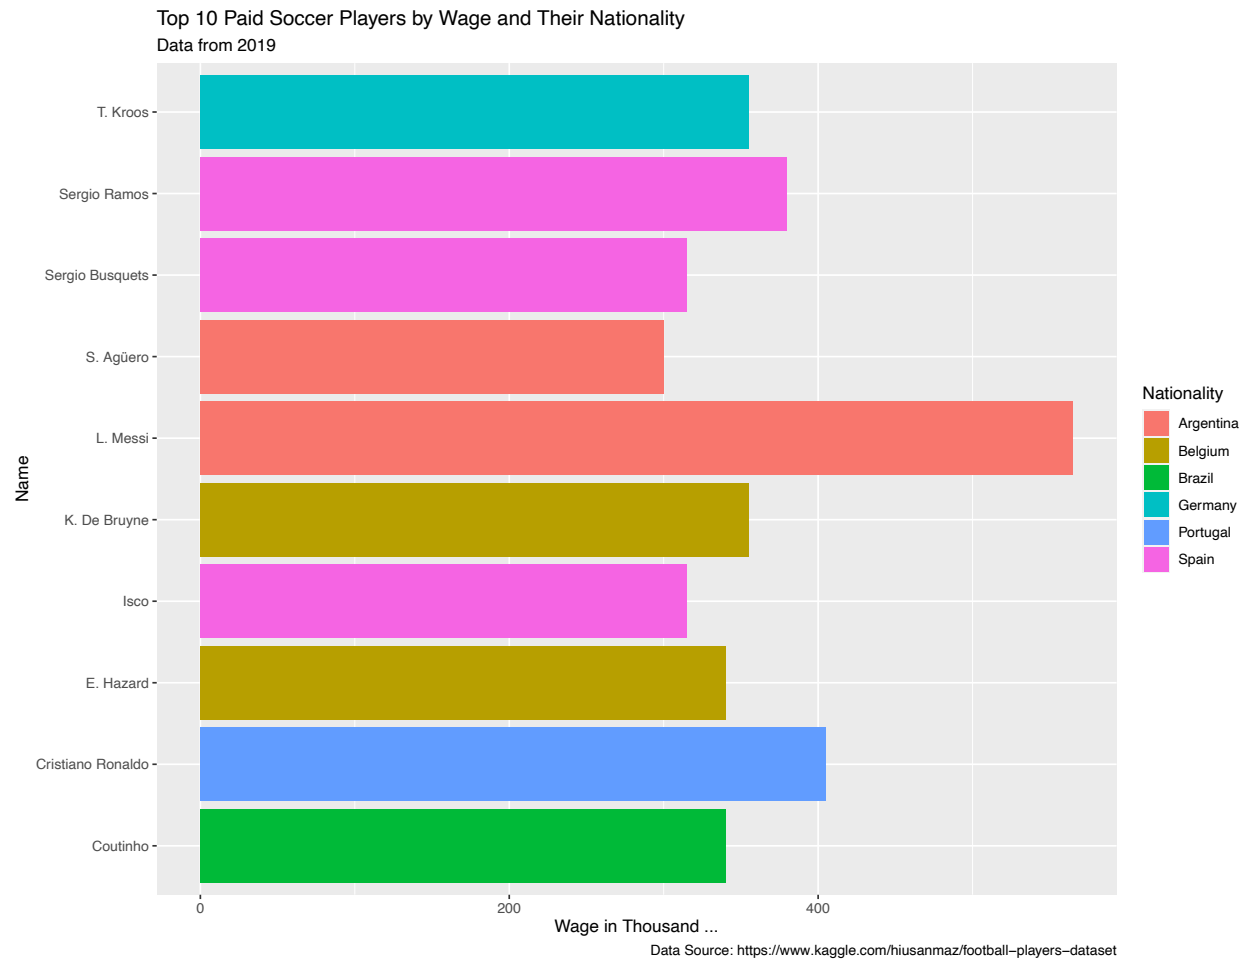

Data Source: <https://www.kaggle.com/hiusanmaz/football-players-dataset>

As we can see the majority of soccer players age range from 19 → 27. As the increase in age, the number of player decreases. The prime time of most famous soccer players is around 21 → 27.

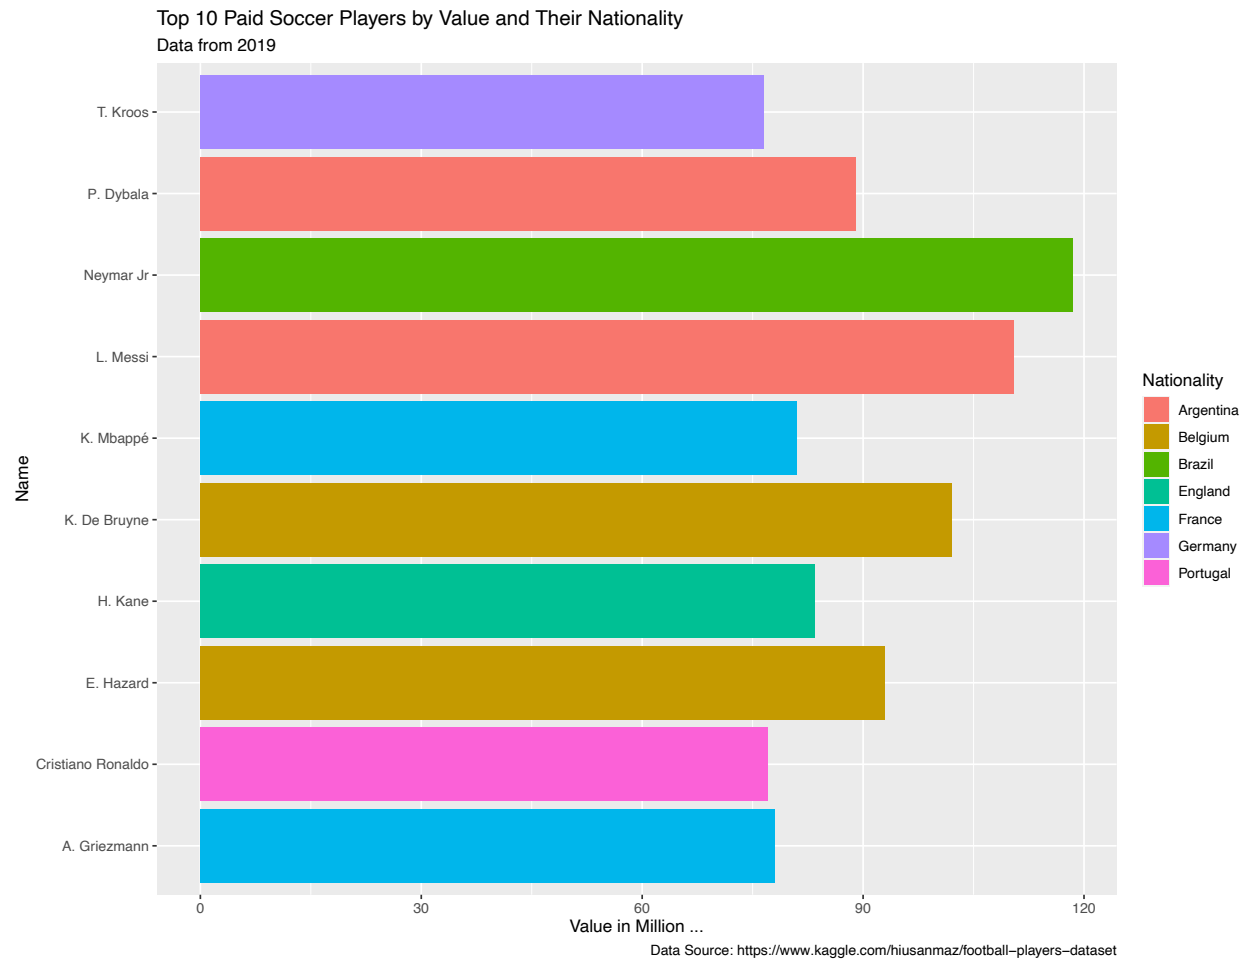

Next we will look at the Top 10 Highest Soccer Players:

- By Wage

These are top 10 players that has highest wage. Leading is L. Messi with more than 500k € /week.

- By Value:

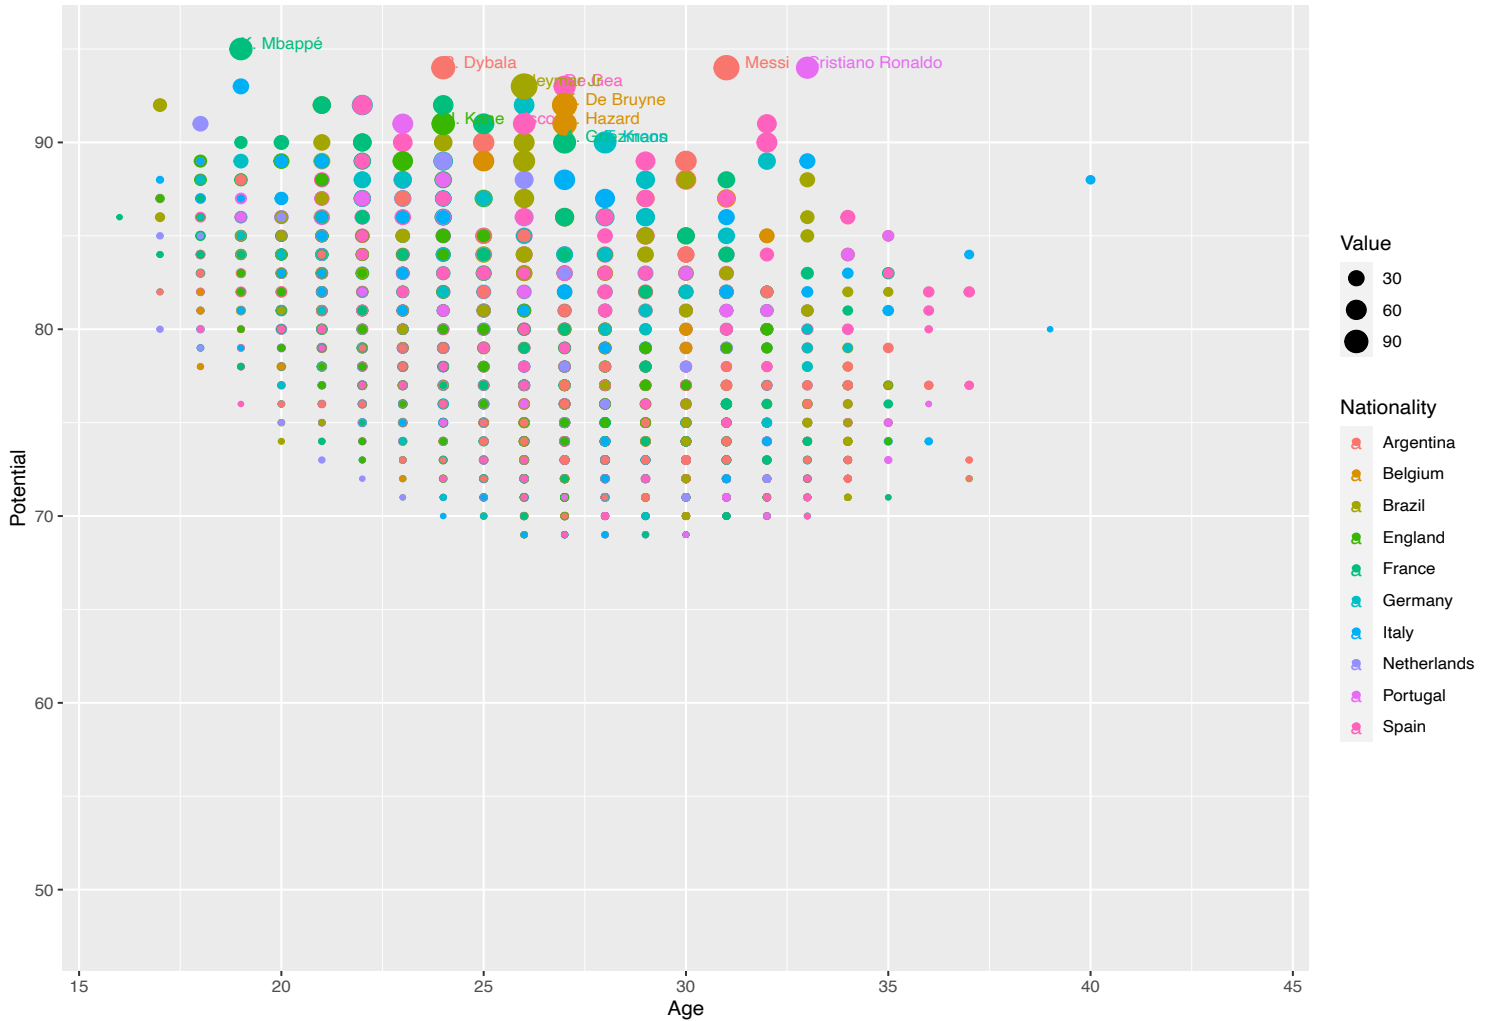

However, when it comes to Value, it shows different aspect. L. Messi has the highest Wage, but not the highest Value in trading. Neymar Jr from Brazil has lower wage than Messi but has highest Value.

This graph shows the visualization to see what might cause differences in Value among soccer players. I pick Age and Potential Point.

Players Value in Million ... Based on Potential Point and Age

Data from 2019

As we can see, the circle dot represents Value. Clearly we can see with low Potential, player has lower Value. Also, with higher rating, and age between 19 → 27 can cause higher in Value. There are some exceptional cases, such as L. Messi and C. Ronaldo with Age over 30.
